Subject: FW: Former Riverside Agricultural Park - Soxhlet v. Extraction Method 3545

Attachments: removed.txt; FRA Ag Park - Grid Sampling Report 12-29-15.pdf

Hi Maryam,

I thought I'd run this past you to make sure I'm on the right page – please let me know if you agree with me....

The owner seems to have compared Soxhlet extraction to extraction method 3545, which is pressurized fluid extraction (right?). The owner didn't compare Soxhlet to ultrasonic extraction. Since the previous Ag Park samples used either Soxhlet or ultrasonic extraction, the comparison of pressurized fluid extraction to Soxhlet is useless for this site...right?

Kathy, I'd also be particularly interested to hear your thoughts on this.

Thanks!

Sara

Subject: Former Riverside Agricultural Park

Maryam,

Attached is the report presenting the results of the November 2015 soil sampling effort at the former Riverside Agricultural Park.

Respectfully,

Ross Surrency, PG Senior Project Geologist
